

**Research Poster Session**  
Presented by Prairie Swine Centre Inc.  
at Saskatchewan Pork Industry Symposium – November 2011

---

The Effect of Diet and Creep Feed on Feed Intake of Weanling Pigs  
*A.D. Beaulieu*

Long-term Feeding of Varied Omega-6 to Omega-3 Fatty Acid Ratios  
Affects  
Sow and Piglet Performance  
*L. Eastwood, P. Leterme and A. D. Beaulieu*

Altering Omega-6 to Omega-3 Fatty Acid Intakes in Sows Influences the  
Immune Response of Their Offspring  
*L. Eastwood, P. Leterme and A. D. Beaulieu*

Effect of Altering Dietary Omega-6 to Omega-3 Fatty Acid Ratios on the  
Immune Responses of Newly Weaned Piglets When Challenged  
with *E. Coli* lipopolysaccharide  
*U. Damdinsuren, L. Eastwood and A.D. Beaulieu*

The Effect of Ramp Configuration on Heart Rate, Handling  
and Behaviour of Market Pigs at Unloading  
*S. Goumon, R. Bergeron and H.W. Gonyou*
